

PIMCO Dividend and Income Fund

Current income with capital appreciation potential

By investing in dividend-paying stocks around the world and select fixed income securities, the fund aims to offer attractive and current income plus long-term growth of capital.

Hypothetical Growth of \$10,000

Growth of \$10,000 is calculated at NAV and assumes that all dividend and capital gain distributions were reinvested. It does not take into account sales charges or the effect of taxes. Results are not indicative of future performance.

Average annual total returns (%) as of 31 March 2024

Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Investment return and the principal value of an investment will fluctuate. Shares may be worth more or less than original cost when redeemed. Current performance may be lower or higher than performance shown. For performance current to the most recent month-end, visit www.pimco.com or call (888) 87-PIMCO.

Certain Funds may offer a share class with an inception date which is different than the inception date of the Fund. For the periods prior to the inception date of a share class, performance information is based on the performance of the Fund's oldest class shares, adjusted to reflect the fees and expenses paid by that class of shares. The performance figures presented reflect the total return performance, unless otherwise noted, and reflect changes in share price and reinvestment of dividend and capital gain distributions. All periods longer than one year are annualized. Periods less than one year are cumulative. The Lipper, Inc. Lipper Average is based on total return, with distributions reinvested and operating expenses deducted, though not reflecting sales charges. Fund classes share the same portfolio, but have different investment minimums and different fees and expenses.

Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index.

There is no assurance that any fund, including any fund that has experienced high or unusual performance for one or more periods, will experience similar levels of performance in the future. High performance is defined as a significant increase in either 1) a fund's total return in excess of that of the fund's benchmark between reporting periods or 2) a fund's total return in excess of the fund's historical returns between reporting periods. Unusual performance is defined as a significant change in a fund's performance as compared to one or more previous reporting periods.

Performance characteristics

INST 30-day SEC yield¹

Subsidized: **4.64%**

Unsubsidized: **4.63%**

¹The 30 day SEC Yield is computed under an SEC standardized formula based on net income earned over the past 30 days. The Subsidized yield includes contractual expense reimbursements and it would be lower without those reimbursements. The Unsubsidized 30 Day SEC yield excludes contractual expense reimbursements.

Inst share Gross Expense Ratio **0.76%**

Inst share Net Expense Ratio **0.75%**

The Net Expense Ratio reflects a contractual fee waiver and/or expense reduction, which is in place through 31 October 2024 and renews automatically for a full year unless terminated by PIMCO in accordance with the terms of the agreement. See the Fund's prospectus for more information.

Inst share Adjusted Expense Ratio **0.69%**

The Adjusted Expense Ratio excludes certain investment expenses, such as interest expense from borrowings and repurchase agreements and dividend expense from investments on short sales, incurred directly by the Fund or indirectly through the Fund's investments in underlying PIMCO Funds (if applicable), none of which are paid to PIMCO.

Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. This and other information are contained in the fund's prospectus and summary prospectus, if available, which may be obtained by contacting your investment professional or PIMCO representative or by visiting www.pimco.com. Please read them carefully before you invest or send money.

[¶]The Securitized bucket will include Agency MBS, nonAgency MBS, CMBS, ABS, CDO, CLO, and Pooled Funds. ^{¶¶}Net Other Short Duration Instruments includes securities and other instruments (except instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position. [§]May include nominal and inflation-protected Treasuries, Treasury futures and options, agencies, FDIC-guaranteed and government-guaranteed corporate securities, and interest rate swaps. ^ΩShort duration emerging markets instruments includes an emerging market security or other instrument economically tied to an emerging market country by country of risk with an effective duration less than one year and rated investment grade or higher or if unrated, determined to be similar quality by PIMCO. Emerging Markets includes the value of short duration emerging markets instruments previously reported in another category.

^ΔOther may include convertibles, preferreds, and yankee bonds.

Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

A word about risk: Equities may decline in value due to both real and perceived general market, economic, and industry conditions. Investments in value securities involve the risk the market's value assessment may differ from the manager and the performance of the securities may decline. Investing in securities of smaller companies tends to be more volatile and less liquid than securities of larger companies. Investing in **foreign denominated and/or domiciled securities** may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. **High-yield, lower-rated, securities** involve greater risk than higher-rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. Investing in the **bond market** is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Bonds and bond strategies with longer durations tend to be more sensitive and volatile than those with shorter durations; bond prices generally fall as interest rates rise, and low interest rate environments increase this risk. Reductions in bond counterparty capacity may contribute to decreased market liquidity and increased price volatility. Bond investments may be worth more or less than the original cost when redeemed. The fund's use of a **dividend capture strategy** may expose the fund to higher portfolio turnover, increased trading costs and the potential for capital loss, and may result in negative tax consequences. **Derivatives** may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. **Diversification** does not ensure against loss.

MV% may not equal 100 due to rounding. Portfolio structure is subject to change without notice and may not be representative of current or future allocations.

MSCI ACWI High Dividend Yield Net USD includes large and mid cap stocks across 23 developed markets and 27 emerging markets countries. The index is designed to include companies with high dividend income and quality characteristics, and that have higher than average dividend yields that are both sustainable and persistent. Securities are screened based on track record of consistent dividend payments with capacity to sustain dividend payouts into the future. Securities are also screened based on certain quality factors such as return on equity, earnings variability, debt to equity, and recent 12-month price performance. Issuer weights are capped at 5%. The index is market cap weighted and rebalanced semi-annually in May and November.

The MSCI ACWI High Dividend Yield Index includes large and mid cap stocks across 23 developed markets and 27 emerging markets countries. The index is designed to include companies with high dividend income and quality characteristics, and that have higher than average dividend yields that are both sustainable and persistent. Securities are screened based on track record of consistent dividend payments with capacity to sustain dividend payouts into the future. Securities are also screened based on certain quality factors such as return on equity, earnings variability, debt to equity, and recent 12-month price performance. Issuer weights are capped at 5%. The index is market cap weighted and rebalanced semi-annually in May and November. The Bloomberg US Aggregate Index represents securities that are registered with the Securities and Exchange Commission, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.
