

PIMCO Open-End Mutual Funds
PIMCO Closed-End Funds

PIMCO SHAREHOLDERS

This document contains tax information on PIMCO open-end mutual funds and closed-end funds (“PIMCO funds”). Certain PIMCO funds may have qualified dividend, qualified short-term and/or qualified foreign rates. The qualified amount, if applicable, will be in box 1b of your Form 1099-DIV. The rates outlined below were used to calculate the qualified amount. See the Form 1040/1040A instructions or consult a tax professional for specific advice on how to determine this amount.

Please call us at the applicable number provided below if you have questions or need assistance. You can also visit the Tax Center page of our website, pimco.com/investments/tax. As PIMCO does not provide legal or tax advice, please consult a tax professional and/or legal counsel with any specific tax questions and concerns.

Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. This and other information is contained in the fund's prospectus and summary prospectus, if available, which may be obtained by contacting your financial advisor or PIMCO representative or by visiting pimco.com/investments. Please read them carefully before you invest or send money.

Closed-end funds, unlike open-end funds, are not continuously offered. After the initial public offering, shares are sold on the open market through a stock exchange. Closed-end funds may be leveraged and carry various risks depending upon the underlying assets owned by a fund. Investment policies, management fees and other matters of interest to prospective investors may be found in each closed-end fund annual and semi-annual report. For additional information, please contact your investment professional.

PIMCO does not provide legal or tax advice. Please consult your tax advisor and/or legal counsel for specific tax questions and concerns.

A word about risk: All investments contain risk and may lose value. Investing in the **bond market** is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Bonds and bond strategies with longer durations tend to be more sensitive and volatile than those with shorter durations; bond prices generally fall as interest rates rise, and the current low interest rate environment increases this risk. Current reductions in bond counterparty capacity may contribute to decreased market liquidity and increased price volatility. Bond investments may be worth more or less than the original cost when redeemed. **Equities** may decline in value due to both real and perceived general market, economic and industry conditions.
